- Unreal C++: basics / integration
- Gameplay Programming
- Plugin Development
- Level Design
- UI/UX Design
- Game Design
- Unity / C#
- Project Management / Agile SCRUM

LANGUAGES

- English C1 (980 au TOEIC)
- Japanese A2
- French Sign Language (2 ans)
- Spanish B1

I am currently a student at Quest Education Group Paris, in my **second year of a Master's degree** in video game development.

I work mainly in **Unreal Engine**, specialising in **Blueprints, gameplay and UX**. I have also developed and published **two Unreal Engine plugins on FAB**: *Twitch StreamSync* and *Even Richer Discord Presence*.

I am looking for a **work-study placement** to continue developing my skills on Unreal Engine projects in production.

PROFESSIONAL EXPERIENCE

**2025
Today**

UE - Blueprint / Plugin Developer

Independent developer - Epic Games FAB

- Development and release of Twitch StreamSync and Even Richer Discord Presence on FAB
- Design of the features and Blueprint APIs for both plugins, designed to remain easy to use within Unreal Engine
- Testing, debugging, documentation, packaging and maintenance of the plugins across multiple versions of Unreal Engine

**January 2026
April 2026**

UE - Game Programmer / Game Designer

Development of an HD2D Souls-like game - Born To Web

- Creation of a GDD for a Souls-like game in an HD2D style
- Laying the foundations for a combat and AI system
- Complete level design for the first areas of the map

**May 2025
August 2025**

UE - Gameplay Programmer

Development of a multiplayer game with CABB Conseil

- Development of a multiplayer game on Unreal Engine using Steam servers
- Player replication and creation of an interaction system
- Implementation of procedural generation to enhance replayability
- Production of a comprehensive GDD for a judging panel

**June 2024
August 2024**

Unity - Chef de projet / AI Programmer

Creating a multiplayer game with G.STUDIO

- Production of a comprehensive game design document and organisation of a team of four developers over a three-month period
- Creation of a complete and functional finite state machine for AI (monsters with pursuit, ranged and melee attack capabilities)
- Design of animations and their integration into the gameplay

**June 2023
July 2023**

UE / XVR - Game Designer / AGILE

BSPP Project Management Assistant - SIMOPS

- Creation of a game design document to meet the needs of the BSPP firefighters
- Assistance during training courses for young firefighters at fire stations in Paris
- Creation of training-ready simulations in accordance with a set of specifications, all using the XVR software
- Development of a template for in-game menus and interfaces
